Exotic Flowers

By Rachel Burke

There are so many beautiful wrapping papers and handmade papers that when you combine them with colored tissue paper the result is an “exotic” flower that can spark up any décor.

- Use the 3”, 4”, & 5” templates and create three different flowers.
- Follow the instructions in the package.
- Thread a needle with strong thread double; then knot.
- The finished look is achieved by using one patterned wrapping paper petal followed by two solid colored tissue paper petals.
- Repeat for up to 18-20 petals total.
- Find just the right vessel and place to display your new exotic flowers!

Scrapbook Pages and Note Paper

By Carol C. Porter

This look is so easy to accomplish, but gives the fun dimensional effect that is so “right” for paper crafting.

The Flower Frill Templates are an easy way to make a flower cut-out. Follow the template instructions, then instead of making a petal flatten out the flower, make several different sizes, layer them up and attach the flower to your page or notes with a brad.

Fiesta Frills

By Carol C. Porter

Make quick and easy decorations for your next “Taco” or “Cinco de Mayo” Party. Using tissue paper to create these flowers is so much fun you’ll want to have a party before the party to make these decorations!

- Purchase tissue paper that has a variety of values in the pack.
- Use the 6” template to create these flowers.
- Follow the directions on the package.

Note that with tissue paper you can cut several layers at a time. Use 2-3 values of per color family to give depth to the flowers. Cut 20- 24 petals per flower.

- Make a hole using a 1/16” hole-punch near the tip of the folded petal; be sure to go through all layers keeping an eye on the folds. Do not punch on the fold.
- Alternate dark, medium, and light petals as you string them on to a 22 gauge florist wire.
- Hold all the petals in one hand and bend the wire down on itself about 4”. Twist wires together and cover with florist tape.
- Open up petals to make a full flower!

“Upcycled” Flowers By Rachel Burke

Before you recycle all those newspapers, magazines, and catalogs “upcycle” them into what will become a very sophisticated green look!

- Use the 6”, 5”, & 4” templates to create these flowers.
- Follow the instructions in the package, but note this, Rachel suggests cutting some of the petals into a point instead of the curve and adding those in for a different texture.
- Thread a needle with strong thread doubled; then knot.
- Make 18-20 petals per flower.
- This presentation is stunning in a silver dish placed on a wooden table. So simple, so elegant!
